BOND SAFARI PADDLE SPORTS · FOR INVESTORS

Hub and spoke

How one hub with seven or eight light spokes lets us cover Kerala’s waters safely, cheaply, and one proven step at a time.

October 2026 · Confidential · for named investors only

THE IDEA IN ONE LINE

Heavy things live in the hub. Spokes stay light.

The hub

One base per region. It holds the workshop, spare fleet, rescue boat and vehicle, senior guides, Academy training and the shop’s stock.

The spokes

Seven or eight launch points on the best waters within reach of the hub. Each has a kiosk, its craft and a small guide team, and little else.

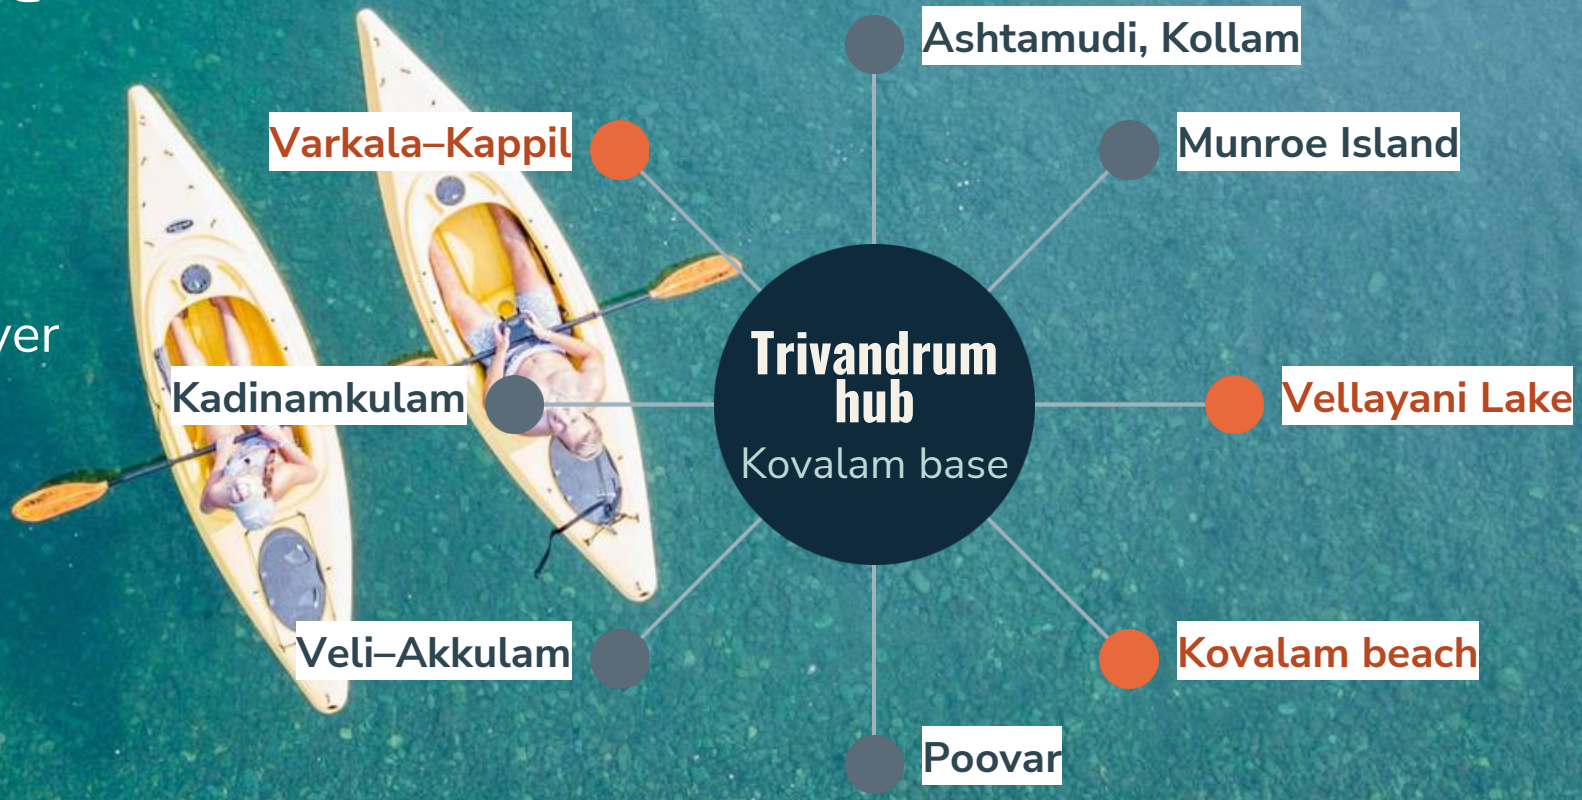

Airlines route through hub airports, and bike-share docks are restocked from one depot. The same logic lets us serve many waters without building, staffing and equipping every one of them in full.

WHAT IT LOOKS LIKE

One hub, eight spokes

Each spoke is a short drive from the hub. Craft, guides and spares move to wherever demand and weather are best that day.

- Opens first
- Opens in later waves

Schematic, not to scale · Bond Paddle Sports network plan, Oct 2026

WHO DOES WHAT

The hub carries the cost; the spokes earn the revenue

Item	Hub	Spoke
Fleet	Workshop, spare craft, repairs and storage	The craft that site needs: about 10–30
People	Manager, senior guides, mechanic, safety officer	A small team of certified guides and a kiosk
Safety	Rescue boat, vehicle, incident lead, training	Rescue cover on the water each session
Academy	Campus: instructor courses and guide training	Tasters and personal awards on its own water
Shop	Store and stock	Kiosk and click-and-collect
Cost to set up	About ₹1.2 Cr each	₹14 lakh (concession) to ₹32 lakh (own site)

Costs from the Bond Safari financial model · two hubs ₹2.40 Cr in the use of funds

WHY IT SUITS PADDLE SPORTS IN KERALA

Six features of our business that the model fits

Light, mobile kit

Kayaks and boards travel on a trailer. A spoke needs a launch point and a kiosk, not a building.

The monsoon

When the sea closes, the hub moves craft and guides to backwaters, lakes and white water.

Many scattered waters

Kerala’s paddling is spread across its coast, 44 rivers and backwaters. Spokes go where visitors already are.

Scarce certified guides

Senior guides sit at the hub and rotate to busy spokes. The hub Academy trains new ones.

One safety standard

One safety officer, rescue kit and training system per region keeps every spoke to the same standard.

Government waters

Many spokes run on concessions, as at Muziris: the jetty is provided, and we bring kit and people.

THE ECONOMICS

Good spokes repay their kit in months

₹1.2 Cr
one hub, shared by 7–8 spokes

₹32 lakh
kit for one owned spoke

₹14 lakh
kit for one concession spoke

Spoke, at steady state	Revenue a year	Margin	Repays its kit in
Kumarakom, owned	₹1.91 Cr	67%	~3 months
Kovalam, owned	₹1.44 Cr	62%	~4 months
Pookode Lake, concession	₹0.33 Cr	36%	~14 months
Muziris, each site, concession	₹0.47 Cr	25%	~15 months
Cherai, owned, small	₹0.18 Cr	31%	~5.6 years

Margins are before hub and head-office costs. The hub turns a weak stand-alone site into a viable spoke, and lets us drop a spoke like Cherai without losing a whole site.

Bond Safari financial model, base case · Muziris revenue share assumed at 20%

PROTECTING YOUR MONEY

If a spoke does not work, we move it, not write it off

1 · Test

Open with the minimum kit, often on a concession, using guides from the hub.

2 · Measure

Track paddlers, margin and safety each month against the gate.

3 · Decide

Grow it, hold it, or trailer the kit to the next water within days.

The first gate is in April 2027. It needs 70% of planned paddlers, a 15% site margin in two peak months, 150 learners and no serious incidents. Expansion money is released only if it is met.

THE KERALA NETWORK

Four hubs and 31 spokes, from Poovar to Kasaragod

Trivandrum

Base: Kovalam

8

spokes in Thiruvananthapuram and Kollam

Opens January 2027

Ernakulam

Base: Kochi–Vypin

8

spokes in Ernakulam, Thrissur, Alappuzha and Kottayam

Two Muziris spokes live since October 2026

Kozhikode

Base: Feroke–Beypore

8

spokes in Kozhikode, Wayanad, Malappuram and Thalassery

Opens FY29

Kasaragod

Base: Nileshwar

7

spokes in Kasaragod and north Kannur

Opens FY30–31

Each spoke belongs to its nearest hub by road. The financial plan funds 18 sites by FY31; the rest of the 31 are a pipeline, outside the projections.

Bond Paddle Sports network plan, Oct 2026 · hubs listed south to north

EVERY SPOKE, RANKED WITHIN ITS HUB

The strongest spokes open first

Trivandrum

Kovalam
Vellayani Lake
Varkala–Kappil–Edava
Veli–Akkulam
Munroe Island
Poovar
Kadinamkulam–Anchuthengu
Ashtamudi, Kollam

Ernakulam

Muziris–Kottapuram (live)
Muziris–North Paravur (live)
Kadamakkudy
Kumbalangi
Marari Coastal Blueway
Cherai–Vypin
Kumarakom
Alappuzha–Punnamada

Kozhikode

Beypore–Chaliyar
Akalapuzha
Pookode Lake
Elathur–Korapuzha
Kadalundi
Dharmadam–Muzhappilangad
Kodenchery white water
Karlad–Banasura

Kasaragod

Bekal–Kottappuram
Valiyaparamba
Chandragiri–Thekkil
Kavvayi
Parassinikkadavu
Thejaswini–Kariyangode
Pazhayangadi–Ezhimala

Bold orange: opens first in that hub. **Bold green**: already trading. Spokes are scored on visitor demand, water and season, competition, ease of permits, and fit with the hub.

Scores are desk estimates, to be confirmed by site visits and permits

OPENING SEQUENCE

Hubs open in turn; each wave is earned by the last

Now

Since October 2026

Muziris–Kottapuram and Muziris–North Paravur, trading

Wave 1

Jan 2027 to FY28

Trivandrum and Ernakulam hubs. Kovalam, Vellayani, Varkala, Kadamakkudy, Kumbalangi; Poovar if its terms are agreed

Wave 2

FY28 to FY29

Kozhikode hub with Beypore and Akalapuzha. Cherai, Kumarakom, Alappuzha, Munroe, Veli–Akkulam, Marari; Kodenchery for the monsoon Academy

Wave 3

FY30 to FY31

Kasaragod hub with Bekal and Valiyaparamba. Pookode, Kadalundi, Elathur, Chandragiri, Kavvayi, Parassinikkadavu

Pipeline

FY32 onward

Six more spokes, outside the projections

The plan funds 18 sites by FY31. Waves 2 and 3 name the best candidates; the order holds, but the count beyond 18 depends on results and cash.

MORE THAN PADDLING

The same network carries the Academy, membership and the shop

Academy

The campus sits at the hub. Tasters at every spoke feed learners into courses, and graduates staff the next spokes: about 280 guides trained by FY31 for about 150 jobs.

Membership

One Paddle Season Pass works at every spoke. Each new spoke makes the pass worth more, at no extra cost to us.

Shop

Stock is held at the hub and sold through spoke kiosks and online, with collection at the jetty. The plan has shop revenue of ₹1.7 Cr in FY31.

A taster at a spoke becomes a member, a member becomes a learner, every learner needs kit, and the hub's Academy trains the guides for the next spoke.

THE ALTERNATIVES WE CONSIDERED

Why not the other models?

Model	Cost to grow	Speed	Safety and quality	If a site fails
One flagship site	Low	Stuck in one market	Full control	The whole business is hit
Full stand-alone sites	High: a workshop and senior staff at every site	Slow	Varies site to site	Buildings and staff left stranded
Franchising to local operators	Low for us	Fast	Hard to control; our name at risk	Brand damage
Hub and spoke	Moderate: one hub per region, light spokes	Steady, one region at a time	One standard per hub	Kit moves to the next water

RISKS OF THE MODEL, TOLD PLAINLY

What could go wrong, and how we manage it

Risk	How we manage it
A hub is a single point of failure	Spare kit split across two locations; insurance; a deputy manager at each hub
Quality slips at small spokes	One safety officer and standard per hub; monthly audits; guides rotate
Permits differ from water to water	Concessions where possible; each spoke checked for its permits before kit is bought
Muziris licence is held by Bond Water Sports	Moves to this company with Muziris Projects' consent
Cross-selling with other Bond companies	Written inter-company terms, approved by the investor director
MD sits on the KATPS Technical Committee	Written recusal from every Bond site's registration

Full risk factors are in the offer letter (PAS-4)

WHAT IT MEANS FOR YOUR INVESTMENT

Your money builds two hubs; the spokes are paid for as they prove out

₹2.40 Cr

of the ₹5.25 Cr round builds the Trivandrum and Ernakulam hubs

18 sites

funded by FY31, with 13 more ready in the pipeline

₹21.9 Cr

planned revenue in FY31, from about 109,000 paddlers

42%

of capacity to break even; the plan reaches 58% in FY31

Capital follows proof. Each new spoke costs ₹14–32 lakh of kit, not a new building, and opens only when the gate before it is met.

Growth is a repeatable pattern. Each new region gets a hub plus seven or eight spokes, built the same way, which later investors and lenders can value.

Bond Safari financial model, base case · projections are estimates, not guarantees

IN SUMMARY

Hub and spoke in three sentences

1. Each hub holds the expensive, specialised things once for its whole region: kit, people, safety and training.

2. Light spokes take paddling to where visitors already are, and can be moved if a water does not work.

3. We open one region at a time, and each wave opens only after the last one meets its gate.

Next: site visits and permits for the first-wave spokes; Gate 1 in April 2027.

Thank You!
